

The LiveLife Mobile Personal Alarm.

Texts up to 5 emergency contacts with your GPS location and then calls them consecutively. Can include 911.

Speak hands free through your pendant.

Finally an emergency alarm that works anywhere.

www.livelifealarms.ca

How it works.

Revolutionary technology

The **LiveLife Mobile Alarm** is an emergency alarm that works wherever there is 3G Mobile coverage through the Rogers Network. The Rogers Network covers 95% of the Canadian population.

When the help button on the pendant is pressed it uses the in-built GPS to send out up to 5 help text messages with the wearer's location on **Google Maps**. This is accurate to 2 metres. When family or friends receive the call from the Mobile Alarm they will already know exactly where the wearer is located.

The Mobile Alarm then begins the call sequence. When the first contact answers the pendant allows the wearer to speak and listen hands free. It's just like a normal phone conversation. The pendant has loud and clear audio. When the wearer is finished talking they can end the call very easily.

Other contacts who have received the help text message can then try calling the pendant if they like.

At any time the contacts can find out the location of the pendant by sending a simple text message to it. It will reply with it's exact location on Google Maps.

Whether you're at home or outdoors and need help, simply press the SOS button.

It then sends 5 help texts with your exact location via GPS and then calls those people consecutively.

When one of your emergency contacts answers you can talk to them through your pendant.

LiveLife Mobile Alarm

Safety and independence for active seniors.

With the **LiveLife** Mobile Alarm you can go almost anywhere knowing help is just a press of a button away. It is perfect for seniors who like to be independent and active. It also an excellent option for seniors living at home who may not have a landline.

It is a stylish pendant that works using the same cellular phone technology as a mobile phone, but without the complicated features.

When activated, the pendant sends 5 help messages using the in-built Swiss U-Blox 7 precision GPS via text with a link to **Google Maps** showing the wearer's location to within 2 metres! It then starts calling up to 5 emergency contacts one after the other using the Rogers mobile network.

You can even include '911' as a contact!

When one of the emergency contacts answers, the wearer is able to **talk hands free** through the **showerproof** pendant. Anyone who knows the mobile number of the pendant can call it and it answers in speaker-phone mode automatically.

You can easily locate the pendant via text.

 **Perfect for people** who are at risk of falls.

Includes a **fall detection** capability designed to activate for more serious falls likely to result in unconsciousness. Alerts all contacts.

No monthly fees ever.
One off cost only.

In an emergency it contacts family and friends, not strangers in a call centre who will just call your family and friends anyway.

Ready to use right out of the box. No setup needed.

The Mobile Alarm is a standalone device with it's own SIM card and mobile number. There is no need to have your own mobile phone. It is very low cost to use on the mobile network.

Small, lightweight and comfortable to wear.

The Mobile Alarm pendant weighs the same as six quarters. It has a soft, non-slip surface and comes with a stylish, safety lanyard.

Being shower proof you can wear it in the shower or even a tropical downpour!

The pendant fully recharges in the charging station in less than an hour. Battery can last up to 3 days.

The wearer can also call one of the emergency contacts at any time if they wish to.
